

National Severe Weather Warning Service

Chief Forecasters Assessment

A shallow depression centred over Lyme Bay will very slowly drift eastwards overnight and fill. The slow movement eastward of the depression will result in the area of rain, some of it heavy, affecting parts of Dorset on its northern side, persisting until dawn when it is expected to ease. A further 10 to 20mm of rain is expected with up to 40mm possible in a few locations.

With the ground already saturated across much of this area, the amounts of rain mentioned above are likely to cause continued problems and local flooding.

The Met Office have issued an **Amber Warning of Rain**

Valid from **00:00 on Sun, 08th Jul 2012** until **06:00 on Sun, 08th Jul 2012**

Outbreaks of rain will continue overnight. This will be heavy at times but is expected to slowly ease around dawn.

The public should be prepared for the likelihood of surface water flooding and some disruption to travel and outdoor activities.
